

# **BUG REPORT**

|            |   |
|------------|---|
| ID         | 13  |
| Name       | Keyboard hiding some fields and can't see what are you typing   |
| Date       | 13/01/2023  |
| Summary    | When you want to add a new product that is not registered in the app the bottom fields are hidden behind the keyboard. Is possible to type in the field because there are a button to go down through the fields but you can't see what are you typing. |
| Device     | iPhone 13   |
| OS version | iOS 16.1.1  |
| Severity   | Low   |

## **STEPS TO REPRODUCE**

1. Open the app
2. On the home page click on '(+)' button to add a meal and navigate to meal screen
3. Inside meal screen click on '(+)New product' button and navigate to new product screen
4. On this screen start filling all fields and when arrive after Carbohydrates fields you can't see what are you typing

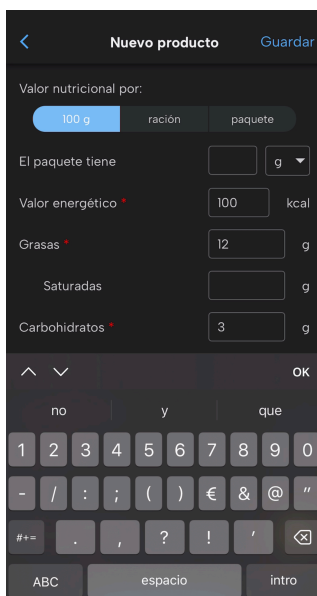

## **EXPECTED RESULTS**

The screen swipes up to see all the fields when you are typing on it.

## **ACTUAL RESULTS**

The screen keeps in the same place and you can't see the fields when you are typing on it.

## **SCREENSHOTS**

Also there are a video to see the complete behavior.
